A few more testimonials:

"I really like how the Toddler Interpreter book offers a simple, clear picture of a sign being made as well as the brief written description of how to make it. I also appreciate the picture index of all signs at the back of the book, listed in alphabetical order for quick reference." Valerie

"I thoroughly enjoyed trying this with my son – combined with his few verbal words, he now signs for "bath", "drink", "where" and "more" which has eased a lot of our stressful times." Paula

"I must thank-you for the Toddler Interpreter book – it's just wonderful and a brilliant way of teaching the young. Sunni is going absolutely fantastic with her baby sign language, she is now even starting to say the words for the movements that she makes." Lauren
